Redefine the user experience

The interior of an elevator significantly contributes to the overall architectural ambiance of a building. Similar to any other enclosed space, an elevator that is user-friendly, adorned with appealing finishes, adaptable color schemes, intelligent lighting, a harmonious soundscape, and digital media content has the potential to elevate the stature of your building.

We have created predefined elevator interior ranges for you to choose from or you can always mix and match between ranges to find the optimal solution.

Build greener

Materials are compliant with LEED low-emitting materials, BREEAM indoor air quality and Nordic Swan material precondition requirements.

Sustainability as our core value

We choose sustainability every day. Our objective is to be a leader in sustainability – not only in our own industry, but also beyond. We want to help our customers make cities better places to live and be their most trusted partner for them throughout their building life cycle.

Soft touch

In search of warm and comforting surfaces to fashion a cozy and welcoming environment, high-pressure laminate emerges as an ideal choice. Renowned for its exceptional durability, this material maintains its desired tactile qualities even with daily usage. Moreover, laminates prove particularly advantageous in optimizing lighting effects to enhance the ambiance further.
